to: Distribution
subject: Safety Walk
from: P. Cirnigliaro

On January 14, 2008 a C-A worker removed approximately 120 lead bricks from the retired D-6 beam line in building 912. This worker was wearing personal protective equipment including the use of a full-face respirator.

Safety Walk Attendees:

S. Pontieri (CA FES Group)
J. White (CA FES Group)

Positive Observations:

- Use of PPE, including gloves, safety shoes, disposable clothing, and a full face respirator.
- IH evaluation of the job was performed during the Work Planning process to protect the worker from lead exposure.
- Supervisor was available and in the area to answer workers questions during the job.
- A Health Physics technician was available to monitor the job.

Negative Observations:

- Use of two workers would have minimized the physical stress of the job.

Distribution: Safety Walk Attendees
